RCM and RNC Wireless module button legend options

To accommodate many commonly encountered programming situations Rako offers a number of RCM module options with button legends to suit these applications. Some are activated from a standard module using 'Advanced Control Panel Features' (see separate Data Sheet for more info).

Standard variants are given opposite although custom etched legends are available at extra cost and extended lead times

Standard scene control

RCM070
4 Scene, Off
Raise/Lower

RCM100
7 Scene, Off
Raise/Lower

RCM101
4 Scene, Off Raise/Lower
+ Blind Control

On Off Options

RCM020
On Off control

RCM040
On Off, Raise/Lower

RCM041
On Off control of
2 adjacent Room Nos

Curtain & Blind

RCM030
Blind Control

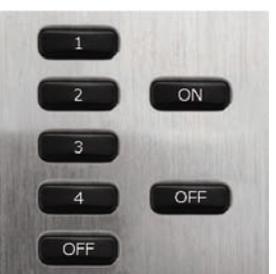

RCM060
Blind control of
2 adjacent Room Nos

RCM071
Blind Control of
up to 8 Blinds

Room Offset

RCM072
4 Scene, Off +
On/Off of adjacent
Room No.

RCM103
4 Scene, Off of
2 Adjacent Room Nos.

RCM102
4 Scene, Off +
On/Off of 2 adjacent
Room Nos.

Wireless

RCM and RNC Wireless module button legend options

RNC

An RNC module is fully configurable using NFC (Near Field Communication) programming. Whilst this gives complete control to the programmer, many situations will want to follow standard programming formats for consistency and clarity.

To facilitate the use of button layouts common with RCM modules the button layouts are available as separate order items and can be easily changed on RNC modules.

Separate order button part codes are given opposite.

RCM Equivalent legend - Separate order button part code

RCM070	→	BR0070
RCM100	→	BR0100
RCM101	→	BR0101
RCM020	→	BR0020
RCM040	→	BR0040
RCM041	→	BR0041
RCM030	→	BR0030
RCM060	→	BR0060
RCM071	→	BR0071
RCM072	→	BR0072
RCM103	→	BR0103
RCM102	→	BR0102

How to fit replacement buttons
