CLOUD GATEWAY

WHAT IS IT?

The Cloud Gateway integrates Rako systems with IoT enabled devices such as Amazon Echo, Google Home and Apple HomeKit.

The Rako Cloud Gateway allows lighting, curtain and blind control from home automation devices.

The Cloud Gateway is the interface between a Rako system and systems such as Amazon's Echo (Alexa), Google Home and Apple HomeKit, allowing voice commands to control lighting, curtains and blinds.

Seamless control of a Sonos home sound system is also possible from Rako systems fitted with a Bridge and Cloud Gateway. Enabling control of Sonos music, from the same Rako keypad that operates lighting, curtains and blinds.

Lights can be turned on and off, scenes selected and curtains/blinds opened and closed. It is also possible to specify percentage levels for individual channels and change the colour of RGB fittings.

By installing a Cloud Gateway and registering an account at my.rakocontrols.com, home automation devices can talk to Rako products over IP. The Rako system must include a Bridge connected to the same network as the Cloud Gateway.

Support for the above IoT services will be introduced throughout 2018.

data sheet CLOUD GATEWAY

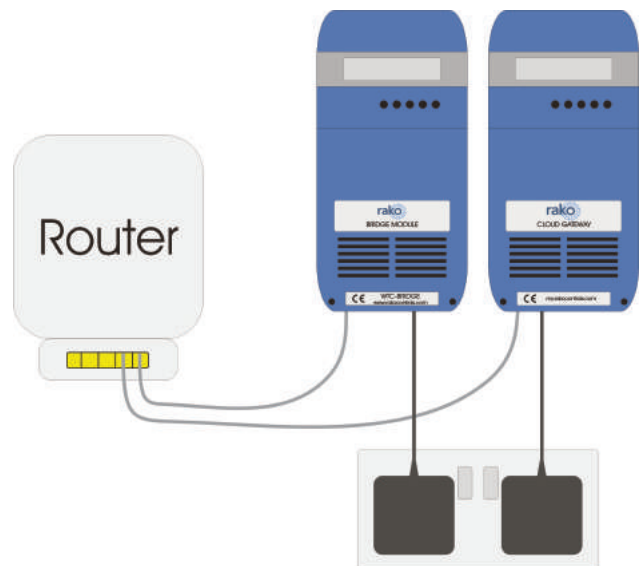

technical data

dimensions	190x105x66mm
input supply	12V d.c. from RAPSU or equivalent. Connection to concentric jack.
weight	305g
housing	UL V0 material
climate range	Temperature +2C to +40C Humidity +5% to 95% non condensing
connections	RJ45 Socket - Ethernet Concentric jack - 12V Power
standards	Emissions - EN61000-6-3 : 2001 Immunity - EN61000-6-1 : 2001
